DOBRODOŠLICA

Spoštovane kolegice, spoštovani kolegi!

V veliko zadovoljstvo in čast nama je, da vas lahko v imenu Slovenskega združenja za klinično kemijo in laboratorijsko medicino ponovno pozdraviva v Portorožu, v prijetnem ambientu kongresnega centra Grand hotela Bernardin.

Slovensko združenje za klinično kemijo in laboratorijsko medicino (SZKKLM) kot samostojno društvo že več kot 30 let povezuje strokovnjake s področja medicinske biokemije in drugih področij laboratorijske medicine. Kot pomembna strokovna organizacija skozi vso obdobje svojega delovanja skrbi in pomembno prispeva k sprotnemu in stalnemu izobraževanju svojih članov, tako z organizacijo različnih strokovnih izobraževanj, strokovnih srečanj in tečajev, kot tudi nacionalnih in mednarodnih simpozijev in kongresov.

Od zadnjega kongresa so minila štiri leta in letos SZKKLM organizira že **7. Slovenski kongres klinične kemije in laboratorijske medicine z mednarodno udeležbo**. SZKKLM sočasno organizira tudi že **7. slovenski kongres inženirjev in tehnikov laboratorijske medicine**. Vzpostavljena organizacija kongresov omogoča pomembno komunikacijo ter predstavlja odlično možnost za izmenjavo strokovnih izkušenj med vsemi strokovnjaki, zaposlenimi na področju klinične kemije in laboratorijske medicine.

7. slovenski kongres poteka pod pokroviteljstvom **Evropskega združenja za klinično kemijo in laboratorijsko medicino (EFLM) in Mednarodnega združenja za klinično kemijo in laboratorijsko medicino (IFCC)**.

Kongres organiziramo v obdobju, v katerem hiter razvoj analitskih in informacijskih tehnologij in modernih orodij pred nas postavlja številne nove izzive, tako strokovne kot etične. Naloga laboratorijskih strokovnjakov ni več samo zanesljiv rezultat laboratorijske preiskave kot tak, ampak tudi njegov vpliv na klinično odločitev in življenje bolnikov.

Program kongresa se začne s plenarnim predavanjem »*A Vision for the Future: Value Based Laboratory Medicine*«, **profesorja Maria Plebanija**, bivšega predsednika EFLM in enega najpomembnejših svetovnih strokovnjakov s področja laboratorijske medicine.

V nadaljevanju je program zasnovan tako, da sledi novostim in izzivom celotnega laboratorijskega procesa, od predanalitskih preko analitskih do poanalitskih vsebin, ki jih bodo predstavili različni priznani tuji in domači strokovnjaki.

Predanalitske vsebine prvega simpozija obravnavajo vplive pogostih odvzemov krvi na stanje bolnikov, sodobne, z umetno inteligenco podprte sisteme za odvzem krvi, stabilnost analitov v vzorcih in prepoznavanje predanalitskih napak ter njihove izzive za prihodnost.

V analitskem sklopu so predstavljeni aktualni analitsko-diagnostični pristopi na različnih področjih laboratorijske medicine in možnosti, ki se odpirajo v prihodnosti.

Mag. Lidija Gobec,
spec.med.biokem., EuSpLM
Predsednica SZKKLM in organizacijskega odbora

Doc. dr. Evgenija Homšak,
spec.med.biokem., EuSpLM
Predsednica znanstvenega odbora

Program kongresa se konča z izzivi laboratorijske medicine pri interpretaciji in podajanju rezultatov kot kompleksne in celovite informacije zdravniku. Vsakemu tematskemu simpoziju sledi interaktivna okrogla miza s predavatelji in udeleženci simpozija.

Vzporeden program kongresa inženirjev in tehnikov laboratorijske medicine dodaja vsebine in primere dobrih praks ter predstavlja tudi širok nabor prostih tem.

Program predavanj dopolnjuje posterska predstavitev, ki ni omejena samo na teme simpozijev in pokriva vsa področja dejavnosti udeležencev kongresa.

Pomemben sestavni del programa kongresa so izobraževalne delavnice sponzorjev ter razstava laboratorijske opreme, kjer proizvajalci laboratorijske opreme in reagentov predstavljajo svoje produkte in predvsem novosti s področja laboratorijske diagnostike.

Kongres bomo popestrili z družabnim srečanjem s podelitvijo društvenih priznanj tistim članom našega združenja, ki so pomembno prispevali k delovanju društva in dosegali uspehe na pedagoškem, znanstveno-raziskovalnem ali strokovno-organizacijskem področju ter s svojim delom pomembno vplivali na razvoj in prepoznavnost klinične kemije in laboratorijske medicine doma in po svetu.

Prepričani sva, da bo kongres dal nov zagon in motivacijo za strokovno delo ter vplival na oblikovanje novih strokovnih povezovanj ter bo tako ponovno pomembno prispeval k nadaljnjemu razvoju klinične kemije in laboratorijske medicine v Sloveniji.

Želiva si, da bi kongres, druženje s kolegi in izmenjave izkušenj, uresničili vaša pričakovanja!

Uspešno strokovno delo in prijetno bivanje v Portorožu!

WELCOME

Dear Colleagues!

It is a great pleasure and honour for us, on behalf of the Slovenian Association for Clinical Chemistry and Laboratory Medicine (SZKKLM), to welcome you once again to Portorož, and to the pleasant setting of the Grand Hotel Bernardin Congress Centre.

For more than 30 years, the Slovenian Association for Clinical Chemistry and Laboratory Medicine has been bringing together professionals working in medical biochemistry and across the broad and continuously evolving field of laboratory medicine. Throughout these years, our Association has been strongly committed to professional education, knowledge exchange and the continuous development of our profession. We have pursued these goals through educational programmes, professional meetings and courses, as well as through national and international symposia and congresses.

Four years have passed since our last congress, and we are very pleased to welcome you today to the **7th Slovenian Congress of Clinical Chemistry and Laboratory Medicine with International Participation**.

At the same time, we are also organising the **7th Slovenian Congress of Laboratory Medicine Technicians**. Holding these two congresses in parallel provides a unique opportunity to bring together professionals with different backgrounds and responsibilities, but with the same common goal: to ensure high-quality, reliable and clinically relevant laboratory medicine.

We are particularly honoured that this congress is being held under the patronage of the **European Federation of Clinical Chemistry and Laboratory Medicine, EFLM, and the International Federation of Clinical Chemistry and Laboratory Medicine, IFCC**.

We are meeting at a very exciting, but also challenging, time for our profession. Laboratory medicine is changing rapidly. Advances in analytical technologies, information technology, automation and artificial intelligence are opening up possibilities that only a few years ago seemed almost unimaginable. At the same time, these developments bring new professional, organisational and ethical challenges. Our responsibility as laboratory professionals goes far beyond producing an accurate laboratory result. We must also understand the clinical meaning of that result, ensure that it reaches the right person at the right time, and recognise how laboratory information can influence clinical decisions and, ultimately, the lives of our patients.

We are delighted that the programme will begin with the plenary lecture, “*A Vision for the Future: Value-Based Laboratory Medicine*”, delivered by **Professor Mario Plebani**, former President of EFLM and one of the world’s leading experts in laboratory medicine.

The scientific programme that follows has been designed to address the latest developments and challenges throughout the entire laboratory process, from the pre-analytical and analytical phases to the post-analytical phase.

The pre-analytical topics of the first symposium address the challenges associated with frequent blood sampling, innovative and artificial-intelligence-supported blood collection systems, sample and analyte stability, and the recognition and prevention of pre-analytical errors.

Mag. Lidija Gobec,
spec.med.biokem., EuSpLM
President of SZKKLM and Organizing Committee

Doc. dr. Evgenija Homšak,
spec.med.biokem., EuSpLM
President of the Scientific Committee

In the analytical sessions, we will explore current diagnostic approaches in different areas of laboratory medicine, as well as new technologies and opportunities that may shape our practice in the years to come.

Finally, we will turn our attention to perhaps one of the most important responsibilities of laboratory medicine: the interpretation and communication of laboratory results. A laboratory result is not simply a number. In different combination It is turned to a complex information that becomes truly valuable only when it is correctly interpreted and effectively communicated to the clinician.

For this reason, each thematic symposium will be followed by an interactive round-table discussion, giving participants the opportunity to exchange views directly with the speakers and with each other.

The parallel programme of the 7th Slovenian Congress of Laboratory Medicine Technicians will complement these topics with additional professional content, examples of good practice and a broad range of free communications.

Our scientific programme will also be enriched by a poster presentation covering a wide range of topics across laboratory medicine.

Another important part of the congress is the exhibition of laboratory equipment, instruments and reagents, together with educational workshops organised by our sponsors. These activities provide an opportunity to learn about new technologies and innovations and, importantly, to strengthen the dialogue between laboratory professionals and industry.

But a congress is also about meeting old friends, establishing new professional relationships, sharing experiences and ideas, and creating collaborations that can continue long after the congress has ended. We will therefore also take the opportunity to celebrate our profession and the achievements of our colleagues during our social gathering, where we will present awards to members of our Association who have made outstanding contributions to teaching, scientific research, professional development and the organisation of our profession. Their achievements remind us that the progress of laboratory medicine is ultimately driven by people — by their knowledge, dedication, curiosity and willingness to work together.

We sincerely hope that this congress will provide you with new knowledge, new ideas and new inspiration for your professional work. We also hope that it will create opportunities for new collaborations and strengthen the professional connections that are so essential for the future of laboratory medicine.

We wish you a successful and inspiring congress, and a pleasant and memorable stay in Portorož.

POSTERJI / POSTERS

7. Slovenski kongres klinične kemije in laboratorijske medicine z mednarodno udeležbo

7th Slovenian Congress of Clinical Chemistry and Laboratory Medicine with international participation

P-1

Ko diagrami spregovorijo: prepoznavanje interferenc v razsevnih diagramih hematološkega analizatorja Sysmex XN

Helena Poplašen (Ljubljana, Slovenija)

P-2

Medlaboratorijska verifikacija indeksa prostih lahkih verig κ v likvorju kot biomarkerja multiple skleroze

Anja Geršak, Tjaša Kadiš, Tatjana Pomer, Rebeka Papa, Mojca Poglajen, Andreja Emeršič, Ines Blaž Kok, Nadja Ižanc Vižintin (Maribor, Ljubljana, Slovenija)

P-3

Etični izzivi v poanalizni fazi laboratorijske medicine: od pravilnega rezultata do odgovorne interpretacije

Borut Božič (Ljubljana, Slovenija)

P-4

Obseg in klinična vrednost ponavljajočega testiranja HEp-2: retrospektivna analiza v Laboratoriju za imunologijo revmatizma, UKCL

Manca Ogrič, Tinka Švec, Saša Čučnik (Ljubljana, Slovenija)

P-5

The effect of frozen storage time on direct renin concentrations

Ajda Biček, Adrijana Oblak, Blaž Krhin (Ljubljana, Slovenija)

P-6

Vpliv kontaminacije vzorcev krvi s fiziološko raztopino na rezultate elektrolitov

Staša Pečlin, Katarina Lenart (Ljubljana, Slovenija)

P-7

Verifikacija vpliva hemolize na rezultate laboratorijskih izvidov

Maja Mahorič, Jelena Krstanović, Eva Fliser (Maribor, Slovenija)

P-8

Vpliv K2EDTA in K3EDTA na stabilnost parametrov hemograma in morfologijo krvnih celic

Julija Benko Miler, Nada Snoj (Ljubljana, Slovenija)

P-9

Vpliv predanalitike na analizo kalprotektina v blatu

Barbara Zajc, Ema Tolar, Aleš Koščak, Branka Svetic (Ljubljana, Slovenija)

P-10

Analitična interferenca pri imunofiksaciji urina – prikaz primera

Petra Malavašič, Tadeja Dežman, Eva Gerden, Vilma Drčar (Novo mesto, Slovenija)

P-11

Verifikacija semikvantitativnega štetja eritrocitov

Lidija Pušnik, Sonja Stropnik, Helena Podgornik (Ljubljana, Slovenija)

P-12

Od kapljice krvi do diagnoze: primer dobre prakse presejanja novorojenčkov na spinalno mišično atrofijo

Polona Lindič, Nika Požun, Matej Kociper, Neža Založnik, Jera Pajnič, Maja Ficko, Tinka Hovnik, Barbka Repič Lampret (Ljubljana, Slovenija)

P-13

Primerjava mikroskopskega pregleda citološkega sedimenta in pretočne citometrije pri diferenciranju levkocitov v telesnih tekočinah

Tanja Gartnar, Aleš Jerin, Jasna Lojk, Elizabeta Božnar Alič (Ljubljana, Slovenija)

P-14

Klinični primer: Fantomska β -hCG

Lucija Dajčman, Evgenija Homšak (Maribor, Slovenija)

P-15

Določanje roka trajanja in stabilnosti med uporabo internega in vitro diagnostičnega pripomočka za merjenje elementov v sledovih

Žan Pušnik, Sabina Islamović, Alenka France-Štiglic (Ljubljana, Slovenija)

P-16

Verifikacija avtomatizirane izolacije DNA iz periferne krvi

Anja Cerovšek, Tamara Grgić, Maruša Debeljak, Jernej Kovač, Robert Šket, Tine Tesovnik (Ljubljana, Slovenija)

P-17

Vrednotenje eozinofilnega kationskega proteina kot biološkega označevalca eozinofilnega vnetja pri atopijskem dermatitisu in alergijski astmi

Sara Simonič, Renata Berdajs, Tina Benčina, Alenka Trampuš Bakija, Tinka Hovnik (Ljubljana, Slovenija)

P-18

Spremljanje aktivnosti faktorja VIII pri zdravljenju hemofilije A z efanesoctocogom alfa

Kaja Lenarčič, Aljaž Pirnat, Barbara Faganel Kotnik, Alenka Trampuš Bakija (Ljubljana, Slovenija)

P-19

Validacija sekvenciranja celotnega humanega eksoma za genetsko diagnostiko

Ana Grom, Kaja Balant Marin, Tamara Grgič, Anja Čerovšek, Maruša Debeljak, Tine Tesovnik, Barbara Čugalj Kern, Jernej Kovač, Barbara Jenko Bizjan, Robert Šket (Ljubljana, Slovenija)

P-20

Vpeljava hematološkega analizatorja za testiranje ob pacientu v rutinsko delo

Vita Jenko, Darja Porovne, Nina Vilfan, Anita Kustec, Branka Svetic (Kranj, Slovenija)

P-21

Vloga prikaza logaritemske skale (LOG 1 in LOG 0) pri prepoznavanju bakterijskih populacij v pretočni citometriji

Leja Novak, Anita Kustec, Branka Svetic (Kranj, Slovenija)

P-22

Zunajcelični vezikli – biološki označevalci prihodnosti ali še vedno le znanstveni izziv?

Katarina Klinar, Helena Podgornik (Ljubljana, Slovenija)

P-23

Centralizacija ročne diferencialne krvne slike, povezovanje znanja in procesov

Barbara Juvan, Gregor Kurinčič, Darja Pungertnik (Ljubljana, Slovenija)

P-24

Razvoj in klinična implementacija starostno prilagojenega Thomasovega grafa za oceno preskrbe z železom in učinkovitosti eritropoeze pri pediatričnih bolnikih

Urška Čegovnik Primožič, Mateja More, Aljaž Šinkovec, Jure Cankar (Ljubljana, Slovenija)

P-25

Fenotipizacija alfa-1 antitripsina v laboratorijski diagnostiki

Urška Čegovnik Primožič, Mateja More (Ljubljana, Slovenija)

P-26

Klinični primer: diagnostični izzivi ob prisotnosti majhnih T-celičnih klonov in sekundarne akutne mieloične levkemije

Sara Čurič, Aleš Goropevšek, Evgenija Homšak (Maribor, Slovenija)

P-27

Optimizacija visokovsebinskega slikanja za kvantitativno oceno 3D hondrogeneze primarnih celic

Lucija Voga, Tilen Burnik, Maša Kandušer, Matjaž Jeras, Janja Zupan, Andreja Trojner Bregar (Ljubljana, Slovenija)

P-28

Prevalenca makrotroponina pri bolnikih s srčno-žilnimi obolenji

Eva Fliser, Rok Arh, Maja Mahorič, Katja Krajnc, Marjeta Dugonik, Andreja Sinkovič, David Šuran (Maribor, Slovenija)

P-29

Global survey on laboratory management training: current state and future directions – on behalf of the IFCC Committee for Clinical Laboratory Management

Annalise Zemlin, Prasenjit Mitra, Praveen Sharma, Mahehseema Ali, Shruti Gupta (Cape Town, South Africa; Milan, Italy; Bengaluru, Chandigarh, Jodhpur, India; Cleveland, Ohio, United States)

P-30

Verifikacija in optimizacija zavrtnitvenih kriterijev indeksa hemolize na analizatorju Siemens Atellica

Tina Žuran Vilčnik, Ivana Jurković Jakopanec (Ptuj, Slovenija)

P-31

Vpliv monoklonskega imunoglobulina na meritev celokupnega bilirubina

Petra Šepec (Celje, Slovenija)

P-32

Vpliv specifičnih zdravil na izbiro metode za določanje aktivnosti faktorja VIII

Ksenija Dvoršak, Martina Fink, Saša Milanović, Helena Podgornik (Ljubljana, Slovenija)

P-33

Primerjava ocenjene glomerulne filtracije na podlagi določanja kreatinina in cistatina C

Sara Malačič, Simona Barat (Murska Sobota, Slovenija)

P-34

Genetic Variants and Immune-Inflammation Indices in Adolescent MASLD

Simona Jurković Mlakar, Aleksandra Klisić, Janja Marc, Barbara Ostanek (Ljubljana, Slovenija; Podgorica, Črna gora)

P-35

Predklinično vrednotenje prostaglandinskega receptorja EP4 kot potencialne terapevtske tarče za zdravljenje kronične limfocitne levkemije

Tijana Markovič, Alenka Šmid, Helena Podgornik, Matevž Škerget, Irena Mlinarič-Raščan (Ljubljana, Slovenija)

P-36

Benigna prehodna hiperfosfatazemija – pogosto neprepoznana diagnoza

Mojca Iršič, Tina Polanc, Nina Piškur, Alenka Sešek Briški, Alenka France-Štiglic, Marko Žavbi (Ljubljana, Slovenija)

P-37

HLA-B27 Homozygosity in Ankylosing Spondylitis: A Case-Based Observation from NGS HLA-B Typing

Zala Kordež, Jasna Omersel, Saša Čučnik, Borut Božič, Žiga Rotar, Katja Lakota (Ljubljana, Koper, Slovenija)

7. Slovenski kongres inženirjev in tehnikov laboratorijske medicine

7th Slovenian Congress of Laboratory Medicine Technicians

P-38

Verifikacija referenčnih intervalov biokemijskih in imunokemijskih preiskav v serumu in plazmi na analizatorju Atellica

Tanja Korpar, Eva Fliser, Tanja Meško (Maribor, Slovenija)

P-39

Verifikacija metode za določanje lipoproteina(a) na analiznem sistemu Siemens Atellica Solutions

Patricija Bandur, Tina Žuran Vilčnik (Ptuj, Slovenija)

P-40

Prikaz kliničnega primera bolnika z malarijo

Barbara Zih, Grega Konda (Celje, Slovenija)

P-41

Predanalitične napake v mikrobiološkem laboratoriju – priložnosti za izboljšanje kakovosti

Polonca Dremelj Mihelčič (Ljubljana, Slovenija)

P-42

Hitra antigenska diagnostika okužb s *Streptococcus pneumoniae* iz urina – primer dobre laboratorijske prakse

Polona Pretnar (Ljubljana, Slovenija)

P-43

Hemokulture v mikrobiološkem laboratoriju – pomen pravilnega odvzema in hitre diagnostike sepse

Maja Renko Šučur, Ljubica Ilić Cvetkovski (Ljubljana, Slovenija)

P-44

Kontrola kakovosti antibiogramov po smernicah EUCAST

Danijela Petrović (Ljubljana, Slovenija)

P-45

Avtomatizirana bakteriološka linija – sodoben pristop v mikrobiološkem laboratoriju

Jure Keber (Ljubljana, Slovenija)

INFORMACIJE ZA PREDAVATELJE / *Information for speakers*

Razpoložljiva **TEHNIČNA OPREMA**:

- Projektor (PANASONIC PT-DZ870) za računalniške predstavitve (resolucija do 1920 x 1200 pik).
- Prenosnik z operacijskim sistemom Microsoft Windows.

Upoštevajte sledeče:

- Lastni prenosniki niso dovoljeni.
- Predavanja bodo potekala v slovenskem ali angleškem jeziku. Simultano prevajanje ne bo zagotovljeno.
- Vse projekcije morajo biti **v angleščini** (ne velja za 7. Slovenski kongres inženirjev in tehnikov laboratorijske medicine)

TECHNICAL EQUIPMENT available for oral presentations:

- *Projector (PANASONIC PT-DZ870) for computer presentation (resolution up to 1920 x 1200 pixels)*
- *Notebook with Microsoft Windows*

Please note:

- *Personal notebooks will not be permitted*
- *Slide and overhead projector will not be available*
- *Please note that all slides must be **in English** (not valid for 7th Slovenian Congress of Laboratory Medicine Technicians)*

PROJEKCIJSKI CENTER / PROJECTION AND PREVIEW CENTRE

Center za predavatelje, ki bo v preddverju dvoran Europa, bo odprt 5. in 6. oktobra od 8.00 do 18.00. Svoje gradivo za projekcijo oddajte vsaj štiri ure pred predstavitvijo. V centru boste lahko opravili poskusno projekcijo in dobili morebitna dodatna potrebna navodila v zvezi z vašo predstavitvijo. Sprejete bodo samo PowerPoint prezentacije na USB pomnilniških karticah in v video format .mp4. Pri pripravi prezentacije je priporočljiva uporaba MS PowerPoint. Velikost drsnice naj bo 16:9 (širokozaslonsko).

We suggest that your computer presentation is installed and tested as soon as possible, but not less than four hours before your lecture. The technical organizer will give you additional instructions concerning your session and the presentation of your paper in the Speakers Centre located in the foyer in front of the Europa halls. Please make sure that your computer presentation is fully operational before your talk. Only PowerPoint presentations on USB Flash drives and videos in .mp4 formats will be accepted. The use of MS PowerPoint is recommended when preparing presentations. The slide size should be set to 16:9 (widescreen).

Opening hours: 05th and 06th October from 8.00 -18.00

NAVODILA ZA PREDSTAVITEV POSTERJA / INSTRUCTIONS FOR POSTER PRESENTATION

Posterji bodo v dvorani Europa - D na ogled ves čas kongresa. Panoji za posterje bodo oštevilčeni. Številka vašega posterja je navedena v programu kongresa, ki ga boste prejeli ob registraciji. Organizator ne odgovarja za posterje, ki ne bodo odstranjeni do 06. oktobra do 18. ure. Avtorje posterjev prosimo, da so med posterskimi sekcijami navzoči pri svojem posterju.

Posters are on display in the Europa – D hall throughout the Congress. Demonstration boards will be numbered. The poster numbers are listed in the congress program. The organizer accepts no responsibility for posters not removed by October 06th at 18.00. Authors are requested to be present at the posters during the poster sessions.

SPLOŠNE INFORMACIJE / GENERAL INFORMATION

KRAJ PRIREDITVE / CONGRESS VENUE

Grand Hotel Bernardin, Portorož - Kongresni center (dvorane Europa)
Grand Hotel Bernardin, Portorož - Congress Centre (Europa halls)

DATUM KONGRESA / DATE OF CONGRESS

5.- 6. oktober 2026
October 05th - 06th 2026

URADNI JEZIKI / THE OFFICIAL CONGRESS LANGUAGES

Slovenščina in angleščina (brez tolmačenja) /
Slovenian and English (no translation is provided)

POLNA KOTIZACIJA VKLJUČUJE / FULL REGISTRATION FEE INCLUDES

- vstop na predavanja izbranega kongresa/simpozija /
Admission to the chosen congress/symposium
- kongresno gradivo / *Congress material*
- ogled razstave / *Free entrance to the exhibition*
- postrežbo med odmori po programu / *Coffee breaks as per programme*
- družabno srečanje z večerjo 5. oktobra / *Dinner on October 5th*

DNEVNA KOTIZACIJA VKLJUČUJE / THE DAILY REGISTRATION FEE* INCLUDES

- vstop na predavanja izbranega dne in izbranega kongresa/simpozija /
Admission to the chosen congress/symposium and day
- ogled razstave / *Free entrance to the exhibition*
- kongresno gradivo / *Congress material*
- postrežbo med odmori izbranega dne / *Coffee breaks on the chosen day*

***Doplačilo za večerjo (5. oktobra): 60 EUR /**

***Dinner fee (October 5th): 60 EUR**

KONGRESNA RECEPCIJA / REGISTRATION DESK

Kongresna recepcija bo odprta v:

ponedeljek, 5. oktobra	od 8.00 do 19.00
torek, 6. oktobra	od 8.00 do 18.00

Registration desk will be open on:

Monday, October 5th 2026 from 8:00 to 19:00

Tuesday, October 6th 2026 from 8:00 to 18:00

IMENSKE PRIPONKE / NAME BADGES

Ob prijavi vsi udeleženci prejmejo imenske priponke. Vse udeležence prosimo, da priponke ves čas nosijo pri znanstvenem in družabnem programu kongresov.

All participants will receive name badges when they check in at the registration desk. The participants are kindly asked to wear their badges throughout the scientific and social programme.

POTRDILO O UDELEŽBI / ATTENDANCE CERTIFICATE

Vsi prijavljeni udeleženci bodo prejeli potrdilo o udeležbi na kongresni recepciji v torek, 6. oktobra 2026, udeleženci z dnevno kotizacijo pa na koncu dneva udeležbe.

All registered participants will receive an attendance certificate at the congress registration desk on Tuesday, 6 October 2026. Participants with a daily registration fee will receive their certificate at the end of the day they attend.

SILM TOČKE / SILM POINTS

7. Slovenski kongres klinične kemije z mednarodno udeležbo; dvodnevna udeležba: **17 točk** /
7th Slovenian congress of clinical chemistry with international participation; 2 days: 17 points

7. Slovenski kongres klinične kemije z mednarodno udeležbo; enodnevna udeležba: **8,5 točk** /
7th Slovenian Congress of Clinical Chemistry and Laboratory Medicine with international participation; 1 day: 8,5 points

ODMORI S KAVO / COFFEE BREAKS

Odmori s kavo so vključeni v kotizacijo in bodo pripravljeni v predverju kongresnih dvoran.

Coffee breaks are included in the registration fee and will be served in the Foyer of the congress halls.

RAZSTAVA / EXHIBITION

Razstava se nahaja v predverju kongresnih dvoran Evropa.

The commercial exhibition is located in the foyer of the Europa congress halls.

VEČERJA S PODELITVIJO DRUŠTVENIH PRIZNANJ / DINNER AND PRESENTATION OF AWARDS

Vse udeležence prijazno vabimo na večerjo s podelitvijo društvenih priznanj, ki bo v ponedeljek 5. oktobra s pričetkom ob 19.30 uri. O točni lokaciji boste obveščeni ob registraciji.

Kongresna večerja je vključena v polno kotizacijo, udeleženci z dnevno ali študentsko kotizacijo se lahko udeležijo večerje za doplačilo 60,00 EUR.

All participants are cordially invited to the congress dinner and presentation of the awards. The exact location will be announced at registration.

The congress dinner is included in the full registration fee. Participants with a daily or student registration fee may attend the dinner for an additional charge of EUR 60.00.

ZAHVALA / ACKNOWLEDGEMENT

Naštetim organizacijam se najlepše zahvaljujemo za finančno pomoč pri organizaciji 7. slovenskega kongresa klinične kemije in laboratorijske medicine z mednarodno udeležbo in 7. slovenskega kongresa inženirjev in tehnikov laboratorijske medicine.

We gratefully acknowledge the financial support of the companies listed below for the organisation of the 7th Slovenian Congress of Clinical Chemistry and Laboratory Medicine with international participation and 7th Slovenian Congress of Laboratory Medicine Technicians.

IT'S MORE
THAN A TEST.
IT'S CLINICAL
CONFIDENCE.

MORE ACCURATELY IDENTIFY A PATIENTS' **RISK OF A FUTURE CARDIAC EVENT**

Abbott's High Sensitive Troponin-I can help to more accurately identify elevated risk of a future cardiac event, even in apparently healthy individuals.

INTENDED USE

For in vitro diagnostic use only.

The ARCHITECT and Alinity i STAT High Sensitive Troponin-I assay is a chemiluminescent microparticle immunoassay (CMIA) for the quantitative determination of cardiac troponin-I (cTnI) in human plasma and serum on the Alinity i and ARCHITECT iSystem analyzers.

The ARCHITECT and Alinity i STAT High Sensitive Troponin-I assay is to be used as an aid in the diagnosis of myocardial infarction (MI) and to aid in the assessment of 30-day and 90-day prognosis relative to all-cause mortality and major adverse cardiac events (MACE) consisting of myocardial infarction, revascularization and cardiac death in patients who present with symptoms suggestive of acute coronary syndrome (ACS).

The cTnI values may also be used, in conjunction with clinical and diagnostic findings, to aid in stratifying the risk of cardiovascular disease, including cardiovascular death, MI, coronary revascularization, heart failure or ischemic stroke in asymptomatic individuals.

Ahead of

New dimensions

Using expertise in automation and science to revolutionise mass spectrometry technology

Ahead of care

cobas® Mass Spec solution

Enter a new dimension in mass spectrometry

Full automation

from sample preparation to result interpretation with random access operation

Seamless integration*

into clinical chemistry and immunochemistry testing as part of **cobas® pro** integrated solutions, as well as lab automation & IT

High throughput

to fit the needs of the routine laboratory for fast and predictable turnaround times - up to 100 injections per hour

Broad assay menu

consolidated on a single platform with standardized performance traceable to reference methods, >60 analytes planned in staggered waves

Fully integrating mass spectrometry into the routine laboratory

Now fully launched in Slovenia

Mass spectrometry today

Mass spectrometry is renowned for its high sensitivity, specificity and accuracy and is therefore considered the gold standard in several clinical indications^{1,7}.

Research⁸ shows that many clinical laboratories would like to benefit from mass spectrometry in order to expand and enhance their test offering, but struggle to do so due to various limitations of the existing solutions on the market, such as:

High technology and operational complexity

High manual burden, lack of integration and standardization

The need for highly specialized and trained expert staff

cobas® Mass Spec solution

In response to the customer needs, Roche developed a true technological revolution – **an entirely automated clinical mass spectrometry solution for the routine lab.**

cobas® Mass Spec solution is:

A total automated solution, all the way from sample preparation through reagent management and result interpretation – **saving hands-on time**

Fully integrated* into the clinical chemistry and immunochemistry testing, as well as lab automation & IT, as part of the successful **cobas® pro** integrated solutions

Achieving a **high throughput**, in order to deliver **faster and more predictable turnaround times**

Consolidating an **extensive assay menu** and generating **high quality, standardized results**, traceable to reference methods

A new dimension of clinical insights made easy for your lab

Extensive assay menu

High quality results

Standardized performance

Broad assay menu in development

Steroid hormones

Vitamin D

Therapeutic drug monitoring

Drug of abuse testing

A new world of possibilities in mass spectrometry

- Are you interested in faster, more reliable and easy-to-use mass spectrometry testing?
- Can you imagine the potential of integrating mass spectrometry into your routine testing and what would this mean for your lab?
- Do you want to be among the first to hear more? Contact your Roche representative.

DxC500i

CLINICAL ANALYZER

Where Flexibility Drives Productivity

Steadfast Performance

- With FlexMode maintenance, run tests on one side of the analyzer while running maintenance on the other.
- Prioritize immunoassay and chemistry testing according to each sample's urgency.
- Reagent load on the fly and rapid throughput.

Practical Simplicity

- The intuitive interface gives even your newest users the support they need to work with confidence and drive value for your organization with proactive task indicators, step-by-step instructions and simplified staff onboarding and training.
- With the DxC 500i, load just one tube for both chemistry and immunoassay testing. That means fewer pour-offs, less time handling samples, more walk-away time, and simpler workflows for everyone.

Trusted Clinical Quality

- DxC 500i shares many reagents and consumables with other
- Beckman Coulter analyzers—its chemistry and immunoassay menus provide a comprehensive view of disease states in a single platform.
- The broad and growing portfolio spans chemistry and immunoassay, and includes high-quality Six Sigma performance assays.

Discrete Clinical Chemistry Analyzer

AA01

for Fecal Immunochemical Tests

- 90 tests/hr
- Automatic Dilution & Retest
- Assay Item : Hemoglobin, Transferrin, Calprotectin, etc.

FIT Hemoglobin AA01
FIT Transferrin AA01
Calprotectin AA01

Izboljšajte zmogljivost in prilagodljivost vašega laboratorija s sistemom **FlexLab™ X** (najnovejša generacija celovite avtomatizacije laboratorijskih procesov), v kombinaciji z **Atellica Solution** integriranimi sistemi za biokemijske in imunokemijske analize

Odlična prilagodljivost z več kot 450 različnimi enotami, modularna zasnova za vaš laboratorij

Odprta povezljivost za zagotavljanje vaših kliničnih potreb

Največja pretočnost na trgu do 15.525 epruvet na uro

BloodScience koncept - Združitev hemostaze in hematologije v enotno platformo. Obdelava citratnih in EDTA vzorcev na skupnem mestu.

Ena avtomatizacijska platforma za citratne in EDTA epruvete
Modularnost XR-9000 in CN linije združuje visoko specializirane analitične rešitve na področju hematologije in hemostaze.

Standardizirani delovni procesi z integriranim predhodnim sortiranjem in arhiviranjem
